Overview	In late 2018, the MSSP was	Same as Level A	Same as Level A
	overhauled with the structure of		
	Tracks 1, 2, 3, 1+ replaced with a		
	Basic and Enhanced track. Basic		
	provides five levels that graduate		
	ACOs to progressively higher levels of		
	risk. The Enhanced Track replaces		
	Track 3. Track 1+ transformed into		
	Level E. Levels A and B offer one-		
	sided risk and new ACOs are allowed		
	two or three years there before being		
	forced to take on risk. CMS said in		
	rulemaking it believes ACOs need to		
	take on risk faster in order to		
	produce greater levels of savings.

Risk adjustment	CMS previously used a risk adjustment methodology that treated beneficiaries differently depending on whether they are considered newly or continuously assigned. CMS finalized a policy to eliminate the distinction between these two beneficiary types. The agency will instead use a positive 3% risk ratio cap between the performance year renormalized risk score and the most recent benchmark year for all assigned beneficiaries.
