### Heritage Medical Systems

HealthCare Providers Accountable Care Organization (HCP ACO)

Data, Data, Data
Strategies for Immediate Actions
Version 2.0

September 2013

#### Immediate Action Topics – V2.0

- 2014 vs. 2013 vs. 2012 Start Dates
- Assignment and risk selection in MSSP
- Care management that makes immediate impact
- Risk scoring in MSSP
- Segment management in MSSP

- 20% +/- are "at risk" to roll through MSSP assignment ever year
- Quarterly Updates
  - Interim reporting
  - Final assignment it is the only one that counts
  - Pioneer is prospective vs. retro
- Can overwhelm care management results
- More difficult for "IPA" style vs. single tax I.D.
- Must be proactively managed

- 20% +/- are "at risk" to roll through MSSP assignment ever year
  - Healthy patients don't see their PCP
  - "Cooking train wrecks" don't see their PCP
  - Patients change PCPs
  - Network leakage
  - Network changes

- Quarterly updates
  - Getting newly assigned addresses
  - Deceased
  - Claims info stop = reassigned to different ACO
  - Where did they go?
- Category
  - ESRD?
  - Dual?

- Overwhelming Care Management
  - 10% fail assignment from low/no claims
    - Starting with only 90% of Benchmark
    - Costs of "users" didn't go down
    - Care management has to save 10% just to breakeven!
  - ESRD qualification is slow
    - 6 or 7x lost benchmark
    - When does the clock start ticking?

# Conclusion: You must manage both Assignment and Risk Selection

#### It is Admissions!!!

	Curren	t		New				
	Admits/			Admits/				
% of Pop	Yr	Admits/000	Tranisitions	% of Pop	Yr	Adı	mits/000	
7%	1 & done	70	0%	10%	1 & done		100	
6%	2-3	150	2% -3%	5%	2-3		125	
4%	4+	180	-2%	2%	4+		90	
17%		400		17%			315	
	Per Case	\$ 10,000			Per Case	\$	10,000	
	PMPY	\$ 4,000			PMPY	\$	3,150	

#### Eligibility Pings - Network Based ACOs

Imminent Transaction

Opportunity Improve Quality and Resources

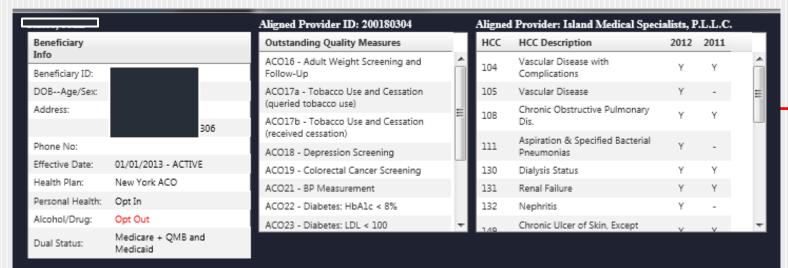

Much Faster Than CLF

Initiate Care Transitions

#### Don't Forget To Ask Your Doctors

OK, so this isn't from CMS – Why Wait?

There will be More Cases to Manage than You have Staff

### Simple Roster – Basic Information

HCP ACO Patient Roster Pleas					Please review your patient panel and circle any condition that is active.								
are Coordinati	on Patitient R	If you have any concern for the patients near term health status that could be improved through care coordination please use the space provided. Please fax or mail to us as soon as possible to xxx-xxx-xxxx											
Date of Birth	<u>Last Name</u>	<u>First Name</u>	<u>Street</u>	<u>City</u>	<u>Zip</u>				Condition	is .			
03/20/1958	Barrett	Michael	<b>123 Main</b>	NY	111111	ESRD	CHF	COPD	Diabietes	Cancer ( Chem/Rad)	Pain Mgt

Phone	202-555-1776		Othe	er Concern G/I track compromised by retrograde motion									

#### MSSP and Risk Scoring

- Pioneers have completely different benchmark formula
- MSSP will received some value for RAF management – not as much as Medicare Advantage
- Is still worth doing
- Has challenges as info is only claim based and not separate file submission as in M.A.

### Risk Score Algebra, MSSP & Relativity

#### **Small Increase in BY 3 Risk Score**

					Risk				
	Risk Score Adj Factor								
<u>Year</u>	Risk Score	(BY3/BYx)	<u>Weight</u>	Component	"Inflation"				
P/BY1	0.75	1.27	10%	0.127					
P/BY2	0.75	1.27	30%	0.380					
P/BY3	0.95	1.00	60%	0.600					
			Imputed Risk Score	1.107	10.67%				
Moderate Incre	ease in BY 3 Risk Sc	ore							
P/BY1	0.75	1.40	10%	0.140					
P/BY2	0.75	1.40	30%	0.420					
P/BY3	1.05	1.00	60%	0.600					
			Imputed Risk Score	1.160	16.00%				
Significant Incr	ease in BY 3 Risk So	core							
P/BY1	0.75	1.47	10%	0.147					
P/BY2	0.75	1.47	30%	0.440					
P/BY3	1.10	1.00	60%	0.600					
			Imputed Risk Score	1.187	18.67%				

#### Submitting New Dx to CMS

- Charting, charting, charting
  - It is not just coding
  - Must meet documentation standards
    - DSP, DSP, DSP, DSP
- Precise wording counts
  - Pressure Sores vs. Ulcers
- NOW coding is easier
- Quality reporting just got easier too
  - Level II codes
  - Precise ICD-9 Codes any bets on ICD-10?

#### Segment Management

- ESRD is 6x or more Aged/Dual
- Dual 20% or more than Aged/Dual
- Disabled often less than Aged/Dual
- Will vary by ACO how are you managing which patients are in each segement?

## Questions?
